

## NURSERY IPOP

### MIXTURES:

#### COMBO SPRAY USING BELOW PRODUCTS:

2ML / L WHOLESOME

2ML / L I-SURGE

2ML / L O-PHOS

#### SECONDARY CULTURE:

IN PROPORTION OF 1 PART SECONDARY CULTURE AND 2 PARTS WATER.

### APPLICATIONS: COMBO

USE COMBO SPRAY IN PROGRESSION AS FOLLOWS:

DAY 1 , DAY 8 , DAY 16, DAY 24 ....

### APPLICATIONS: SECONDARY CULTURE

USE SC WITH WATER AS A SPRAY (FOLIAR) AS FOLLOWS:

DAY 4 , DAY 12, DAY 20, DAY 28...

### Notes:

**Wholesome** will improve salt management, fungus and bacteria. It will improve protein metabolism for hardening efficiency (more protein = more abiotic resistance), systematic uptake of nitrogenous nutrients and control of Ph.

**I-Surge** will improve the root growth dynamics, microbial growth in root zone and nutrient uptake dynamics of macro and micronutrients.

**O-Phos** will make the phosphorus uptake and energy mechanisms of the soil and cell elongation / division efficiency.

Secondary Culture will create optimal environment for the roots and establishment of the exchange dynamics of microbes with the root systems.
